

Problems:

The major problems affecting solid waste management are unscientific treatment, improper collection of waste

Problem solution:

To solve this problem, we have designed a process that ensures proper disposal and efficient waste management. The procedures we designed involves creative initiative that will inspire people to dump in designated area or bins, and innovative method by using decreasing time algorithm for monitoring garbage

Problem root cause:

- Lack of Public Awareness.
- Refusal to Learn About Compliance.
- Insufficient Investment in Waste Management.
- Lack of Proper Machinery
